

Acorns in Ikutaryokuchi Park

①②③④⑤⑥⑦⑧⑨⑩⑪⑫

The acorn is called "Donguri" in Japan. It is the nut of the oaks and classified in Fagaceae. 22 kinds of Donguris are distributed all over Japan, and you can easily find several types in Ikutaryokuchi park.

Please don't stray off the path for vegetation protection. Collecting wild animals or plants is prohibited in the park.

Acorns in Ikutaryokuchi Park

Fagaceae

Quercus
